CONTENTS

Tectonophysics Volume 204

Special section: The Afro-Arabian Rift System (edited by R. Altherr)

The East Anatolian Fault: an oblique collisional belt
N. Lyberis, T. Yurur and J. Chorowicz (Paris, France), E. Kasapoglu and N. Gundogdu (Ankara, Turkey) 1
Tectonic evolution of northern Wadi Araba, Jordan
M. Atallah (Irbid, Jordan) 17
A-type granite and the Red Sea opening
R.G. Coleman and S. DeBari (Stanford, Calif., USA) and Z. Peterman (Denver, Colo., USA) 27
Array observations of PKP phases across the Kenya Rift: Implications for structure and tectonics
W.V. Green and R.P. Meyer (Madison, Wis., USA) 41
The Kenya rift axial gravity high: a re-interpretation
C.J. Swain (Harare, Zimbabwe) 59
Seismicity distribution from temporary earthquake recording networks in Kenya
J.A. Tongue, P.K.H. Maguire and P.A.V. Young (Leicester, UK) 71
Neogene tectonics and volcanicity in the North Tanzania sector of the Gregory Rift Valley: contrasts with the Kenya sector
J.B. Dawson (Edinburgh, Scotland, UK) 81
Apatite fission-track analysis of Kenyan basement rocks: constraints on the thermotectonic evolution of the Kenya dome. A reconnaissance study
M. Wagner and R. Altherr (Karlsruhe, Germany), and P. Van den haute (Gent, Belgium) 93
Three-dimensional characteristics of dike intrusion along the northern Iceland Rift from inversion of geodetic data
Y. Du and A. Aydin (West Lafayette, Ind., USA) 111

Regular section

Research Papers

Observation of fault gouge development in laboratory see-through experiments
K. Haggert (Parkville, Vic., Australia), S.J.D. Cox (Mt Waverley, Vic., Australia) and M.W. Jessell (Clayton, Vic., Australia) 123
Attenuation of surface waves across the Arabian peninsula
D. Şeber and B.J. Mitchell (St. Louis, Mo., USA) 137
A new method for combining gravimetric and geological data
C. Castaing and N. Debeglia (Orléans, France) 149
A rupture model for the great earthquake of 1897, northeast India
V.K. Gahalaut and R. Chander (Roorkee, India) 161

Discussions

Evidence of multiphase deformation in the Rajang–Crocker Range (northern Borneo) from Landsat imagery interpretation: geodynamic implications
* Comment – C.S. Hutchison (Kuala Lumpur, Malaysia) 175
* Comment – N.S. Haile (Ulu Kelang, Malaysia) 178
* Reply – F. Bénard and C. Muller (Rueil-Malmaison, France) 181

Book Reviews

The Benue Trough: Structure and Evolution, by O. Ofeogbu (Editor) – J.D. Fairhead 183
Principles of Earthquakes Source Mechanics, by B.V. Kostrov and S. Das – J. Lomnitz-Adler and C. Lomnitz 183
Rheology of Solids and of the Earth, by S. Karato and M. Toriumu (Editors) – H.R. Wenk 184
Deep Marine Environments: Clastic Sedimentation and Tectonics, by K.T. Pickering, R.N. Hiscott and F.J. Hein – L. Garter 185
Precambrian Continental Crust and its Economic Resources, by S.M. Naqvi (Editor) – G.A. Gross 186
Seismic Noise Attenuation, by E. Kanasewich – E.S. Husebye 188
The German Continental Deep Drilling Program (KTB): Site Selection Studies in the Oberpfalz and Schwarzwald, by R. Emmerman and J. Wohlenberg (Editors) – H. Berckhemer 189

Annotated Bibliographies of Mineral Deposits in Europe. Part 2, Western and South Central Europe, by J.D. Ridge – M. Lécolle 190
Seismology and Plate Tectonics, by D. Gubbins – T. Rikitake 191

Letter Section
The seismicity of Fennoscandia
R. Olsson and E. Skordas (Uppsala, Sweden) 193

Special section: Frictional Melting and Processes and Products in Geological Materials (edited by J.F. Magloughlin and J.G. Spray)

Frictional melting processes and products in geological materials: introduction and discussion
J.F. Magloughlin (Minneapolis, Minn., USA) and J.G. Spray (Fredericton, N.B., Canada) 197
A physical basis for the frictional melting of some rock-forming minerals
J.G. Spray (Fredericton, N.B., Canada) 205
Fault structure, wear mechanisms and rupture processes in pseudotachylyte generation
M.T. Swanson (Gorham, Mc., USA) 223
Microstructural and chemical changes associated with cataclasis and frictional melting at shallow crustal levels: the cataclasite-pseudotachylyte connection
J.F. Magloughlin (Minneapolis, Minn., USA) 243
Effects of lithology, cataclasis and melting on the composition of fault-generated pseudotachylytes in Lewisian gneiss, Scotland
R.H. Maddock (London, UK) 261
Major- and trace-element constraints on the petrogenesis of a fault-related pseudotachylyte, western Blue Ridge province, North Carolina
K. O'Hara (Lexington, Ky., USA) 279
Formation of Alpine mylonites and pseudotachylytes at the base of the Silvretta nappe, Eastern Alps
N. Koch and L. Masch (Munich, Germany) 289
The development of pseudotachylyte in the Ivrea–Verbano Zone of the Italian Alps
K.S. Techmer, H. Ahrendt and K. Weber (Göttingen, Germany) 307
Frictional melting of sedimentary rock during high-speed diamond drilling: an analytical SEM and TEM investigation
L.A. Kennedy and J.G. Spray (Fredericton, N.B., Canada) 323

Regular section

Research Papers
Granitic magma transport by fracture propagation
J.D. Clemens (Manchester, UK) and C.K. Mawer (Albuquerque, N.M., USA) 339
High-grade reworking of central Australian granulites. Part 1: Structural evolution
B. Goscombe (Parkville, Vict, Australia) 361
Geophysical properties of the lower crustal granulites from the Qinling orogenic belt, China
L. Qingsheng and G. Shan (Wuhan, China) 401

Erratum 409

Contents Volume 204 (1992) 411

Guide for Authors
